

# LABORATORY DESCRIPTION

## General Information

School	Geosciences
Department	Forest and Natural Environment Sciences

## Title of the Laboratory - Acronym

Forest Protection

---

## Head of the Laboratory

Yannis Raftoyannis, Professor

---

## Short Description

The Forest Protection Laboratory aims to produce and transfer knowledge in the scientific field of Forest Protection. To this end, it conducts basic and applied research on forest and tree protection (biotic and abiotic factors), forest fires (prevention, settlement protection, post-fire management), climate change and ecosystems (effects, adaptation), restoration of degraded ecosystems, management of urban and suburban greenery, mushrooms etc. At the same time, it supports the implementation of relevant undergraduate and postgraduate courses such as Forest Pathology, Forest Entomology, Forest Fires, Mushroom Science, Drought and Vegetation, Urban Green Protection, Natural Disasters, etc.
